DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest the claimed method and apparatus for testing the tensile load bearing properties of an uncured prepreg composite material, especially including a housing comprising a cavity sized for at least partially containing an uncured prepreg sample to be tested *an expandable bladder* at least partially contained in the housing, and a block located at least partially within the housing and interposed between the bladder and the cavity for containing an uncured prepreg sample to be tested, the block urged towards the cavity to apply pressure to the sample when the apparatus is in use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

New formal drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings in the application are informal. Applicant is advised to

Art Unit: 2855

employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The formal drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for formal drawings will not be held in abeyance.

Conclusion

The prior art made of record on the attached PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.
